Amendments to the Claims

The listing of claims presented below replaces all prior versions, and listings, of claims in the application.

Listing of claims:

1-16. (cancelled)

17. (previously presented) A method for manufacturing[[, the]] a decorative material according to claim 13, wherein the ionizing radiation curing resin composition, containing an ionizing radiation curing resin and a declustering silica which is a silica whose surface is treated with a fatty acid based wax, is coated on a base material sheet formed into the luster adjusting resin layer, with no solvent, by using a doctor blade and a gravure plate to form a luster adjusting resin layer (on the base material).

18-26. (cancelled)

27. (new) The method for manufacturing a decorative material according to claim 17, wherein the ionizing radiation curing resin composition contains no solvent.

28. (new) The method for manufacturing a decorative material according to claim 17, wherein an amount of the declustering silica contained in the ionizing radiation curing resin composition is in a range of 5 parts by mass to 20 parts by mass to 100 parts by mass of the ionizing radiation curing resin.

29. (new) The method for manufacturing a decorative material according to claim 27, wherein an amount of the declustering silica contained in the ionizing radiation curing resin composition is in a range of 5 parts by mass to 20 parts by mass to 100 parts by mass of the ionizing radiation curing resin.

29. (new) The method for manufacturing a decorative material according to claim 18, wherein the luster adjusting resin layer is formed in pattern on the base material sheet.
